Vivek Mishra

Full-Stack Developer (MEAN Stack) | Angular · Node.js · Express.js · MongoDB

Greater Noida, Uttar Pradesh, India | +91-7905456461 | vivek79054@gmail.com

LinkedIn | GitHub

PROFESSIONAL SUMMARY

Full-Stack Developer and B.Tech Computer Science and Engineering graduate (2026) with 6 months of professional software development internship experience building and shipping production features for live web platforms using Angular, TypeScript, Node.js, Express.js, and MongoDB. Skilled in RESTful API development, responsive UI engineering, MongoDB data modeling, and Git-based agile workflows, backed by a strong foundation in data structures, algorithms, and object-oriented programming. Additional hands-on experience in Android development and on-device machine learning.

TECHNICAL SKILLS

Programming Languages: JavaScript (ES6+), TypeScript, Java, Python, SQL, Kotlin (Basic)

Frontend: Angular, RxJS, Angular Signals, Angular Material, HTML5, CSS3, SCSS, Responsive Web Design

Backend: Node.js, Express.js, RESTful APIs, JWT Authentication, Socket.IO

Databases: MongoDB, Mongoose, SQL, SQLite, Firebase (Firestore, Realtime Database)

Mobile Development: Android SDK, Android Studio, Java, Kotlin (Basic), Firebase Authentication, Google ML Kit, CameraX

Tools & Practices: Git, GitHub, Postman, VS Code, Agile Methodology, Code Reviews, Version Control

Core Concepts: Data Structures & Algorithms, Object-Oriented Programming (OOP), DBMS, Operating Systems, Computer Networks, Software Engineering

Exposure: Machine Learning Fundamentals, On-Device ML Inference

PROFESSIONAL EXPERIENCE

Software Developer Intern | **FiveRegTech Co. Pvt. Ltd.** **March 2026 – September 2026**

Full-Stack Development (Angular, Node.js, MongoDB) | *Remote* *6 Months*

- Developed and maintained Angular and TypeScript front-end modules for the Connect Bharat platform, translating product requirements into responsive, reusable components used across multiple features.
- Built RESTful APIs with Node.js and Express.js and designed MongoDB/Mongoose data models that powered core application workflows end to end.
- Delivered full-stack features (Angular, Node.js, MongoDB) to Startworks, a live production platform, owning work from UI to database.
- Applied data structures and algorithms to build efficient, well-structured solutions to real product requirements under production constraints.
- Diagnosed and resolved bugs across front-end and API layers, improving reliability for end users on a live platform.
- Collaborated in a cross-functional agile team using Git and GitHub for version control, participating in code reviews and daily standups.

PROJECTS

Face Detection Android Application | *Java/Kotlin, Google ML Kit, CameraX* GitHub

- Built an Android application using Google ML Kit Face Detection for real-time, on-device face detection, extracting attributes such as smile and eye-open probability from live camera input.
- Integrated CameraX for real-time on-device ML inference, optimizing performance for smooth detection.

Weather Forecasting Application | *Angular, TypeScript, REST APIs*

- Built a responsive Angular application displaying real-time temperature, humidity, and wind speed for user-searched locations via the OpenWeatherMap REST API.
- Implemented error handling and loading states to keep the experience reliable during API failures and network delays.

SANGEET – Music Streaming Application | *Java, Android SDK, SQLite* GitHub

- Developed an Android music streaming application supporting audio playback, playlist management, and library search.
- Implemented SQLite integration for local song metadata and user preferences, with efficient activity lifecycle management for smooth playback.

EDUCATION

Bachelor of Technology (B.Tech), Computer Science and Engineering **2022 – 2026**

Amity University, Uttar Pradesh *Greater Noida, Uttar Pradesh*
